ICT OFFICER

Experienced ICT Officer with a proven history of providing technical solutions and support for various information and communication technology ICT systems. My strong grasp of programming languages and software development processes, coupled with my Bachelor of Science in Computer Science from Kabarak University, have expanded my knowledge and prepared me for excellence in the field of ICT Technical aspects. My expertise lies in troubleshooting and resolving issues related to ICT infrastructure servers and database systems, ensuring their seamless operations. Additionally, I am adept at implementing and maintaining system softwares ranging from organizational management software to custom built support systems. I am well familiar with both Windows and Mac OS operating systems, Database and domain management from my experience and knowledge gained from both school and industrial work exposure to these systems.
